@DDDDDDDDDDDDDDDDDDDDDDDDDDDDDD ABSTRACT (23 lines) DDDDDDDDDDDDDDDDDDDDDDDDDDY
```

Failure Analysis Associates Inc of Menlo Park, CA, an engineering research firm that analyzes disastrous explosions and breakdowns and tests consumer products for possible defects before they reach the market, uses specially designed computers for many of its operations. Crash-testing of automobiles, which accounts for 50 percent of Failure Analysis' business, involves attaching computers to dummies and to the automobile to measure impact, fluid dynamics and other events during the test crash. All information is stored in a special database which includes animated graphics and video. Most software is developed in-house. The company was founded in 1967 and went public in 1988, reporting revenue of almost $60 million. It does not advertise, relying on word of mouth and its
