

Expose the Red Plotters

Chicago Herald - Amer 11/16/39
CHAIRMAN DIES of the House committee on un-American activities is returning to Chicago. He will investigate reports that Communists are trying to take over the control of labor in two great industries that are essential to Chicago's prosperity and the nation's well-being—meat packing and the manufacture of farm machinery.

The Dies committee already has exposed the destructive activities of Communists in the automobile industry.

It has revealed that radical elements in labor organizations, under Communist influence, have called strikes and instigated "slow-downs" in various automobile plants with the obvious object of crippling production at a time when it should have been at its peak.

That was intended as a blow at American prosperity.

The committee has revealed also that radical labor elements under Communist influence delayed production of airplane parts for the United States Navy.

THAT was a DIRECT blow at the SAFETY of America in a time of critical danger, when the nation was striving to

build up its defenses as rapidly as possible.

ALL this follows EXACTLY the pattern of sabotage and treachery by which Communists in France, ACTING UNDER ORDERS FROM MOSCOW, demoralized French industry, delayed French defense preparations and all but destroyed France a few years ago.

Communists in America, ALSO acting on orders from Moscow, are trying to undermine and weaken America for conquest in the WORLD-WIDE REVOLUTION that was Lenin's dream and is Stalin's dream today.

If they are now preparing to strike at America through two great Chicago industries, then Chicago and America must KNOW it, so that something can be done to prevent it.

Chairman Dies' new Chicago inquiry will have the sympathy and support of all Chicagoans whose hearts are with America. It will have the SPECIAL sympathy and support of the sensible and patriotic majority of Chicago LABOR.

The Communist plotters must be ROOTED OUT!
