**Investigation
Of Nazi *Nazi*
Agent Asked**

3/10/39
Dr. John Lechner, American Legion official, this week asked the State Department to investigate why Dr. Colin Ross, Nazi propagandist, had not registered as a foreign agent as required by federal law.

"Dr. Ross planned to carry on where Leni Riefenstahl failed," Dr. Lechner declared of the Hitler agent, who was reported to have come here to supervise a motion picture of American life and industry, for distribution in Germany.

Dr. Lechner quoted liberally from a book, "Unser Amerika," written by Dr. Ross, in which such opinions as the following were expressed:

"Thirty million Germans in the United States should assert the rights of their blood, by every and any means."

"We Germans in the old country can only watch the great revolution that is preparing over there, not altogether impartially, to be sure."
