Subject GODER

Fome little time past I suggested the use of a code for "special" use.
The following one is simple to follow and hard to "key out"..
There are twelve months in the year, and thirty days in September date..

strate ere amerae mercere ru eres heer bent mitte fring in pelitember centes

The key to the code must be found by use of the full apphabet from "A" to "Z"...

A B C D E F C H I J K L M N C P Q E S T U V W Z Z Z --- The alphabet

QRSTUVWXYZABGDEFORIJELENNOF — Code A becomes "Q"for sending purposes.

Were I to use the "code" as of to-day I would call it the 12 th month, therefore counting backward from "Z" as "I" and counting twelve I would stop at the letter forward "O" ——Then it being the 23 rd.day of the month I would count 23 letters/from and including the letter "O" until reaching the end of the alphabet I would start again at "A" calling "Z" as thirteen, and continue to the cletter "K", which becomes the first letter or "A" of the alphabet (for sending purposes in code) for example Y O V R would be spelled O M K H in "Gode".

ANEMERICAN NEW months usage 6 dihos? queix 10htqom

The above is set for sending the last letter is "No" as my signature——reading before sending (in blocks from 1- to 10) KENHENENGHERIEN NYIEU WORTH UDAJE HAUDT TIJOQ DIROC QUAIX OULES HENDE———

Tell me what you think of the idea ...

Respectfully substitted 7 Maya
