

Say Ad Club Head Is Pal of Nazis

571574
The Non-Sectarian Anti-Nazi League has written an open letter to the board of directors of the Advertising Club of New York, asking if the directors knew of charges that ~~John A. Zellers~~, their newly elected president, has been accused of links to pro-Nazi organizations and pro-Nazis.

In its letter, the League pointed out that Zellers was associated with the pro-Nazi American Fellowship Forum and spoke at its meetings. Friedrich Auhagen, who headed the Forum, is now in jail for failing to register as an enemy agent.

The other charges against Zellers are based on publication of a document seized by the Dies Committee and included in its *White Paper*.

This document purportedly described the German plan to "insure industrial domination in America in the event of German victory in the war." Zellers's name was on the document as the proposed chairman of the board of directors of a body intended to play a major part in bringing about and perpetuating this "German domination."
