

# FINN SPY-CONSULATES SHUT; AGENTS WORK ON

*DW* By Art Shields *SP/4*  
Closing of the Finnish consulates in New York and other American cities yesterday was a step in the right direction, but—

The Finnish Axis Government continues its spy work in the United States through the Finnish Legation in Washington and the Finnish White

Guard organizations in New York, New England, the Lake States, the Pacific Coast cities and elsewhere. White Guard leaders and other fascist friends of Hjalmar Procope, the Finnish Minister, continue working on Army and Navy construction jobs where military and naval secrets abound.

This spy work continues in the United States, while Finnish soldiers invade the Don lands and German planes attack American ships from Finnish bases.

**SPREAD "MEIN KAMPF"**  
It continues while the Finnish Government pushes the Finnish edition of Hitler's "Mein Kampf," which was published in Helsinki in 1940 at Government expense.

The publication of "Mein Kampf" with Government funds sealed the alliance between General Mannerheim, the butcher ruler of Finland, and our enemy in Berlin. This publication has been often reported in Finnish newspapers in the United States and in Finland.

Last week The Worker reported that Minister Procope's former clerk, Eiro Nester Lappalainen, was working on a key naval job in an eastern port, where naval secrets abound.

Procope's former clerk still has access to the same naval secrets.

Foreman John Pentilla, the German-trained "Jaeger Captain," who took part in the overthrow of the Finnish people's government, has access to the same naval secrets.

So does Hjalmar Honkonen, the White Guard leader and former editor of the pro-Axis newspaper, the New Yorkin Uutiset of 41 E. 125th St., whom we exposed last week.

The Normandie disaster was a warning of the danger of permitting fascists to work on key naval jobs.

## CHEERED NORMANDIE DISASTER

Finnish Whites laughed uproariously at the news of the destruction of the 80,000 ton transport at a meeting, where a representative of the Finnish Legation was speaking.

The Finnish newspaper Eteenpain of Yonkers, N. Y., a firm supporter of the United Nations, reported the laughter, which swept through the hall of the Finnish Educational Association at 255 E. 125th St.,

the Legation. Toivola made a guarded reference to the Normandie disaster, and he got no further till the merriment subsided.

Toivola is a brazen Axis propagandist.

"... the Finns... do not conceive the world war as a war for or against democracy," he said in a letter in the May 14 issue of the New York Times.

And they don't hope for peace, he added, until "the present system in the Soviet Union collapses."

The Daily Worker branded this poison as "enemy propaganda" in an editorial the next day.

## PALS WITH PROCOPE

Toivola and Procope are frequently seen at Finnish White Guard centers.

The Legation's semi-official spokesman, the New Yorkin Uutiset, in its June 11 issue, reported Toivola's presence at an affair in the White Guard center at 43 E. 125th St., June 9, where pro-German propaganda was voiced.

The affair was a reception to 60 Finns, who had just arrived on the S. S. Gripsholm from the old country.

The Uutiset carefully hid the names of the travelers, but it reported some things they said that night in the hall of the so-called "Loyal Finns" organization.

They said through their spokesmen that the "relations between the Finns and the Germans are very good" and that Finland is getting military support from Hitler.

## ANTI-SEMITIC PROPAGANDA

The Uutiset has been furnishing the fascist propaganda line for White Guard Finns in New York for many years. It's open anti-Semitic agitation in the first years after Hitler took power inspired the Jew-baiting that abounds in the Finnish White centers today.

After Pearl Harbor the Uutiset advised the Whites to be careful in their public discussions on the war.

"Talk with only half the mouth" was the slogan that appeared in this paper and in other White organs such as the Raivaaja of Fitchburg, Mass.

Talking with "half the mouth" the Uutiset praises Herbert Hoover, vilifies our Soviet ally and lauds

# DECLARE WAR

The United States must declare war on the Finnish fascist government NOW.

A war declaration will close the Finnish spy center in Washington.

It will close the White Guard spy centers in New York and other cities.

It will shut off the Axis propaganda appearing in Finnish White Guard papers.

It will tell the world that the Government that invades the Don lands and helps sink American ships is our enemy.

It will result in the smashing of Hitler's puppet Government in Helsinki by the forces of America and the rest of the United Nations and speed Hitler's defeat in Germany itself.

broadcasts from Helsinki, which it gets from Lieut. Romo of the Finnish Information Center and from White Guard agents in New York.

These broadcasts repeat the lies that the war is Finland's private war, which should not impair her relations with America.

Talking with the whole mouth before Pearl Harbor, the Uutiset had hailed the Finnish-Hitler alliance in its July 3 issue, last year. In an article signed "Dixi," the Uutiset said:

"They are some boys, those Finns—not even Germany dared to attack Russia without their help."

In following issues Procope's newspaper spokesman sniped again and again at the Roosevelt war policies.

## ATTACKS SECOND FRONT

But the whole-mouth line is too dangerous today. The "half-mouth" helps Hitler more.

And talking with "half the mouth," the "Raivaaja" of Fitchburg, Mass., on July 25 attacked the Second Front demand at the CIO rally on July 22 as a "Bolshevist" demand.

The Mannerheim organ says the "people" are "outsiders" in this war. "Any interference by any outsiders," says the same editorial, "even by the 'people,' they call themselves in this instance, who have insufficient knowledge, may develop dangerously."

The Raivaaja, another Procope spokesman, is the organ of the Finnish Social Democrats, who have become Mannerheim's warm supporters today, though the butcher was butchering them in 1918.

The Finnish Social Democratic centers, such as the Finnish Educational Association in New York, are White Guard centers today, which Procope and Toivola frequent with the same enthusiasm with which they fraternize with the Loyal Finns and Mannerheim Veterans at 43 E. 125th St. and the so-called Nationalist Finns at 4th St. Brooklyn.

Closing of Consul Vaherhuovi's offices at 40 Whitehall St. won't stop Finnish Axis agents in America while the White Guard centers and Procope's Legation continue their work.

A declaration of war, however will settle their hash.

# SHUT; AGENTS WORK ON
