

PRO-NAZI RADIO STATION SEIZED BY MEXICANS

MEXICO CITY, June 14 (INS)

—Charging that it communicated with Berlin, President Camacho today expropriated the powerful radio station at Villa Acuna, near the American border, formerly owned and controlled by Dr. John R. Brinkley, goat gland specialist.

The American Government was reported to have informed the Mexican Government of the recent activities of the station, which formerly broadcast rejuvenation cure claims of Dr. Brinkley.

Camacho acted after his agents investigated charges of the station's pro-Nazi activities. A government announcement said "abundant proof" of these charges was obtained.

Dr. Brinkley built his station several years ago when the Federal Radio Commission ordered him off the air. Dr. Brinkley is no longer associated with it.
