Dear Tom,

As you know, travel is unsafe for me so I cannot be at the discussion of and final vote on the proposed final interpretative regulation on what is an assassination record.

I would like the record of that session to reflect the fact that, as I have informed the board often, I believe that defining out of "assassination record" what the agencies have done to and about criticisms and criticism of the official "solution" and of the official investigations of the assassination the board will be eliminating some of the more important of all assassination records and what the people should know about the agencies so that the democratic system can work. I therefore believe strongly that the final definition should include these and similar records and that if they do not the board will be assuring that it will not meet the purposes for ~~which~~ which it was created.

If the NARA update is in writing I will appreciate a copy.

Thanks.

Sincerely,

Harold Weisberg
