

This happens to the Wiseman's file copy that was given to me in addition to the less clear xerox I was to have been and was give.

Use it to show how the FBI lies to itself from the lies I've marked, how the long-lasting and costly litigation came to be filed, and estimate how many documents I was provided after this claim to full compliance.

Especially on pictures and lab records, of which I got more than a thousand additional and relecant copies, and pictures, of which I got hundreds without getting all the files disclose the FBI has, particularly those of the crime scene.

I never did get copies of the pictures taken by the newspapers from the FBI, that Hester said they had in Memphis, but I did get some from the photo agencies.

The reasons for these lies are obvious. The lab records and the photos are or tend to be exculpatory, as a considerable portion of the approximately 60,000 additional pages of records I got, as this book for the first time shows.
