FBI-king Section 47, Serials 3837-3900, 22 31 documents, 238 pp. released. First Serial is 133 pp Miami report on which there is a separate sheet of a few notes.

3877-Hoover overrules others and favors a Readers Digest article by O'Leary on Ray and the 10 most wanted. If what is said about O'Leary here is true he needed no Bureau aid. This, however, fits with that part of my request not responded to about what was provided to other writers. They have alleged to have no records. This surely is one and is indicative of more.

Most of this is nonsense in which SAC Gamble at B'ham asks permission to spend money to circularize the dispensers of liquor "minerature" (or fused) and the Bureau deliberates which of two minor publications dealing with those who practise the tonsorial arts should receive the regular, public information on Ray.

3896 is a 48 pp ^{Portland} ~~Memphis~~ report of 5/23. ~~xxxxxxxxxxxxxxxxxxxx~~
It has its share of the ridiculous, indicative of FBI desperation.
