

5/8/71

Dear Jim,

I found and marked things in Soucie that you apparently did not.

On suable agency

Distinction between factual and investigatory reports

temptation of government to "an expansive interpretation" of the exemptions

That material can be deleted if necessary, but the material made available

That an executive order is required to invoke "national defense"

And even then there can be in camera inspection

Even Wilkey found "that the thrust of the Act is to limit the grounds for agency withholding to the exemptions therein stated (re Werdig's verbal argument).

HW
