

1/2/70

Mr. James Wexler, Archivist  
The National Archives  
Washington, D.C. 20408

Dear Mr. Wexler,

Mrs. Angel's letter of the 30th is welcome not alone because it is the first time in so, those many months, that there has been any response in any way like a month's time I am grateful for the worthwhile enclosures with it. They do contribute to knowledge. But this coincides with my having filled a DIB form asking me whether if I have been too persistent in filling such forms.

Unfortunately, the letter is not without pain, nor without self-mourning statements also suggesting existence of the filing of this form for the Tamm documents, not strictly in accord with the facts of the record, and a reminder of long unanswered and, I think, quite proper inquiries that may have ended the recall of the employee who originally drafted this letter.

Taking this last first, I quote this sentence, "We have previously informed you of the material in the name file (sic) for Ferrie that is withheld from release". You have denied over giving me a list of such documents, have refused to give me one in the present, and are completely without response to the letter I wrote after accepting your suggestion to examine this file. I then wrote you the file was deleted, that there was virtually nothing in it. There certainly was nothing else you do require to show the withholding of documents. But precisely it is only that a mere cover might have slipped since my request that you have not responded to it. My letter was dated 11/26/69. Would you please tell me where you "informed" me of the material the classification of which I have for so long and so fruitlessly sought? Aside from your agreement to do that you have no manpower shortage, there is interpret in this sentence, "We are unable to locate the manpower needed to examine the thousands of pages of material in the Commission's files to determine" because of preparing a complete list of material relating to Ferrie. On the one hand, you claim certain things must be withheld to preserve them, and on the other you permit files to be copied, make no effort to examine them, and do not bother to respond to inquiries about them. Why if you have been true to trust, if your have not permit for the Ferrie file to be copied, had not received documents from it without the regularity seen replacing them, said problem would not exist, for the Ferrie name file (you doest no but one of Commission origin) would have 100% of this.

Moreover, you have a record of everyone who has ever had access to this file. So you once informed me, it is a criminal offense to remove anything from such a file. If the irretrievable happens, that no one other than a federal employee or agent, burglarized this file, have you taken any steps since I informed you of it to bring him to justice? Have you, for example, informed the FBI about it? Or, if these pages were always withheld, how could anyone other than a federal employee be in a position to remove them.

Despite the obvious interpretation of your silence following my letter

3A4

RECORDED BY  
HAROLD WEINBERG

seven months and eight days ago, I would be interested in any explanation, no matter how long delayed, for I have this continuing interest in Morris, as I also do in suppression and the sensitivity of our institutions and the integrity of the public's property, which is what every paper is your custody is.

One of the valuable pages you sent me bears a file identification, to JEP B. I would appreciate knowing the origin of all the others. I realize these may all come from that file, but the only page marked is not, chronologically, the first.

I note an inconsistency in the deletions, by which I mean those which was deleted from the long memo, not the transcript. In some cases, where the word "deleted" is written in, the description is masked, apparently by the over-laying of a piece of paper in xerching. In others, as with the O'Sullivan case that is of interest to me, if it is not, yet in the printed transcript this has, indeed, been excised. Would you please tell me whether you did this deleting and, if you did, the basis for selection and the legal justification? Also, it appears that in some cases, where the notes on this memo indicate there was deletion, the printed transcript does not so indicate. Yet, if you did this editing, how did you know what to remove?

Mr. Kelley's letter of May 11 does cite two Secret Service Control numbers for Feltro Documents, but the Commission identification is missing. My request for this has not been responded to. It may well be that I not only have but have written about these documents, but because the Commission used its own numbers rather than the Secret Service's identifications, I cannot be certain, nor can I be certain that the copies I may have may be complete. Supplying the CP numbers could be helpful and all I need.

However, this serves to remind me that you have not responded to my request for copies of all covering letters with which you were sent material in response to my requests of others, material I was led to believe had been sent you for me. I would still like those, and as soon as possible, please.

There remain other letters that are without response. It is in no way my responsibility to see to it that you take care of your mail before it gets lost or mislaid, and it is an apparent futility to accept your invitation to refresh your recollection, for I have done so, at great cost in time and effort, to no purpose. However, I think in fairness to you I should remind you of the and substance of my purpose, the fact that you do have responsibilities, including to me, and to see to it that there is proper and expeditious response to proper inquiries, for this is your function, for which I bear my part of the seat. I therefore do expect that these inquiries will be properly and completely responded to, as they should have been so long ago.

sincerely,

Harold Weinberg
