

10/18/70

Dear Jim,

In working away at a stack accumulating for some time I've found some things I think will interest you greatly in connection with the clothing/pix suit. This includes government regulations, interpretations, etc., which led me to reread some things I had and to see possibilities I had not seen earlier.

We can go into this whenever you are here again, for I'll have these things available and noted. There is not now any rush on that.

Another thing, if it is not too much trouble (and sooner or later we'll need it anyway): can you get me a copy of PL 89-318, 79 Stat 1185? I believe it will be misused.

I think it might be worth your thinking what advice you'll give me if I get an offer from Archives to give me the pictures they've been denying me as a compromise against all the things I've asked for. Of course, I'd have to study them first. As of now, I'd also not settle ~~xxx~~ without other pictures I might want made for me. I have no solid reason to say there is a likelihood this will happen, but right now it seems to me to be a possibility, and it is good not to have to make decisions without opportunity to think them through.

The pictures they have shown me but will not copy for me are not enough. They do not show enough views.

Sincerely,

388
