Mr. Harold Weisberg
Route 12
Old Receiver Road
Frederick, Maryland 21701

Dear Harold:

Subject: Neutron Activation Analysis

The FBI did not give me the data on Q-3 in the fifty-seven pages referred to in the July 15, 1977 Kelleher letter and has still not done so. In addition, they say that Q-15 was not so examined. Would you please provide me with copies of any NAA material on these two items along with any others (excluding Tippit) which I do not yet have? What I have at present is shown on the chart I sent you some time back.

I wish to put all of that information on a graph for an article which I have been asked to do, by two friends who are putting a new assassination periodical together. I would also like your permission to use material from POST MORTEM for which I will of course give you full credit. I will not be receiving any payment for the article.

Your earliest possible response will be most appreciated.

Sincerely,

Emory Brown
