

OFFICE OF THE DIRECTOR

UNITED STATES DEPARTMENT OF JUSTICE

FEDERAL BUREAU OF INVESTIGATION

WASHINGTON, D.C. 20535

September 21, 1976

Mr. Emory L. Brown, Jr.
82 Squankum Road
Howell, New Jersey 07731

Dear Mr. Brown:

This is in reference to your letter dated August 24, 1976, to Mr. Jay Cochran, Jr., Assistant Director of the FBI Laboratory Division. This response is being handled by the Freedom of Information-Privacy Acts (FOIPA) Section since your inquiry pertains to documents furnished in regard to your previous FOIPA request.

As you have previously been advised, the FOIPA does not provide for interpretation of disclosed documents. It only provides for searching of an agency's records to locate documents. We have provided you with all known documents pertaining to this matter.

As you were advised in my letter dated September 17, 1976, the testimonies of the FBI Agents who conducted these examinations are printed in the "Hearing Before the President's Commission on the Assassination of President Kennedy." The testimony of Special Agent Robert A. Frazier may help to answer your questions.

Sincerely yours,

Clarence M. Kelley
Director

JOHN F. KENNEDY, 11/22/63
DALLAS, TEXAS
AFO

File # 62-109060-239
Lab. # PC-78318 GH

Examination requested by: FBI, DALLAS (69-43) Letter 11/27/63

Examination requested: Spectrographic

Date received: 11/27 ram

Result of Examination:

Examination by: GALLAGHER

- Q53 (A) Back of right hand.
(B) Front or palm side, right hand
(C) Back of left hand
(D) Palm or front side of left hand. *side of right thumb*
(E) Long and narrow section ~~could be interesting for~~
(F) Long triangular section - side of left thumb.
(G) Thin slab from right cheek

Specimens submitted for examination

- Q53 Seven plastic bags, each containing one piece of a paraffin cast
Q54 Paper envelope in which paraffin cast of right hand of Lee Harvey Oswald was brought to Dallas City-County Criminal Investigation Laboratory
Q55 Paper envelope in which paraffin cast of left hand of Lee Harvey Oswald was brought to Dallas City-County Criminal Investigation Laboratory
Q56 Paper envelope in which paraffin cast of right side of face of Lee Harvey Oswald was brought to Dallas City-County Criminal Investigation Laboratory
Q57 Paper sack in which seven pieces of paraffin casts were placed
Q58 Paper sack

Also Submitted: Copy of report dated 11/23/63, of Dallas City-County Criminal Investigation Laboratory regarding examination of paraffin casts of right side of face, left hand and right hand of Oswald.

REPORT
of the

FEDERAL BUREAU OF INVESTIGATION
WASHINGTON, D. C.

To: **FBI, Dallas**

Date: **March 6, 1964**

Re: **LEE HARVEY OSWALD
IS - R**

FBI File No. **105-82555**

Lab. No. **PC-78318 GH**

Specimens received **11/27/63**

PARAFFIN CASTS FROM LEE HARVEY OSWALD

- Q53A Back of right hand
- Q53B Front or palm side of right hand
- Q53C Back of left hand
- Q53D Front or palm side of left hand
- Q53E Long narrow section side of right thumb
- Q53F Long triangular section side of left thumb
- Q53G Thin slab from right cheek

- Q54 Paper envelope in which paraffin cast of right hand of Lee Harvey Oswald was brought to Dallas City-County Criminal Investigation Laboratory
- Q55 Paper envelope in which paraffin cast of left hand of Lee Harvey Oswald was brought to Dallas City-County Criminal Investigation Laboratory
- Q56 Paper envelope in which paraffin cast of right side of face of Lee Harvey Oswald was brought to Dallas City-County Criminal Investigation Laboratory
- Q57 Paper sack in which seven pieces of paraffin casts were stored from 11/23/63, to 11/27/63
- Q58 Paper sack of the type in which the casts from Oswald were stored from 11/23/63, to 11/27/63

Results of examination:

The paraffin casts, Q53A through Q53G, were analyzed by neutron activation analyses to determine if these paraffin casts from Oswald, which were made, chemically treated and washed by the Dallas law enforcement authorities bore any deposits which could be specifically associated with the rifle cartridge cases found in the Texas School Book Depository Building following the President's assassination. As a

result of these examinations, the deposits found on the paraffin casts from the hands and cheek of Oswald could not be specifically associated with the rifle cartridges. Elements (barium and antimony) were found on the casts; however, these same elements were found in powder residues both from the above rifle cartridge cases and from the revolver cartridge cases which were fired from Oswald's revolver reportedly between the time of the assassination and the time of apprehension.

No characteristic elements were found by neutron activation analyses which could be used to distinguish the rifle from the revolver cartridges.

In view of the fact that the paraffin casts were not made until after the reported firing and handling of the fired revolver, no significance could be attached to the residues found on the casts other than the conclusion that barium and antimony in these residues are present in amounts greater than would be expected to be found on the hands of an individual who has not recently fired a weapon or handled a fired weapon.

No identifiable particles of powder residues were found in the envelopes and sacks, Q54 through Q58.

The submitted evidence is being retained.

Addendum: Mr. William S. Lyon, Dr. Frank F. Dyer and Mr. Joel F. Emery all of Union Carbide Corporation, Oak Ridge, Tennessee, who have studied data from Oswald's casts concurred in conclusion of this Laboratory report.
