

3/12/76

Dear Jim,

You are doing a first-rate job of editing and reorganizing the hasty affidavit draft I gave you for 75-1996. It was, therefore, abreeze to go over. I've made few suggestions. It ends in an incomplete paragraph. If you have not done so I suggest that you tackle Wiseman with me head-on in even his /Tyler's revision of my request to limit it to the "death bullet" and rifle, saying that if this is not false swearing than the representation made about what Frazier would testify to by the Da in Memphis 3/10/69 is false because it specifies tests with which I was not provided. Microscopic.

If any more comes tomorrow I'll do it immediately and mail it as fast as I can. This may even be in Baltimore or New York if I can get to the post office here in time.

Do you want to add to the part where you refer to when I was pro se that when ~~initially~~ the U.S. Attorney promised the court that the pictures I asked for would be taken, quoting the Archives assurances, it then evolved that after the FBI took phoney pictures of the tie, quintessential evidence, after the Warren Commission had and used the tie as evidence, in some mysterious and entirely unexplained manner the knot of the tie was taken apart. That tie was in FBI possession until 11/1/66. The Archives told me they never touched it from the time they received it from the FBI. And the FBI staged and gave the Warren commission a phoney picture of that tie to make a false account of how it was damaged seem to be real. When I got the tests on that tie they proved the official account of it having been nicked by a bullet was false. I have now published all of this without a peep from the FBI or anyone else. What I have in mind in this is giving a case of destruction of evidence by the FBI and a case of the making of false promises by the government and especially the USAtty's office.

I'll not explain all the few suggestions and corrections. For example, the 1/22 transcript could not have been "destroyed" because it was never made. Until we got it.

This reminds me. It would be a good precaution to bring your Hermes, which is the same size if a different face than the machine you use now. If you have a change to make that is simple you can and if not simple we can have it xeroxed here before I execute it.

I think the local banks are open Friday nights, so if you want to be absolutely sure of getting it all done the it would be a good idea to plan to be able to stay long ago. I have no faith in your Vegas cure and believe that once you are home you'll be going to bed at 4 a.m. again. And sleeping until 10:30. For an affidavit of this length and with all the fact to be sworn to me must be careful and not rush too much. They are looking for me, as you know, and this is one way I don't want them to find me.

Floyd is away speaking this weekend so I can't reach him. He phoned me before he left. If you can, please call him as soon as you read this and tell him I may again ask him to meet the train when I return. He and I both thought I'd be going to your place to work on this affidavit. I may not be able to make a bus connection with the train on which I may come back. I will call him and let him know. If I can connect with a bus in Baltimore I will. And won't ask him. But if I can't I'll be marooned. Tell him that if he can meet me or have me met I'll go to the Beltway station if at all possible. If as before I can come back at night I can take the same train he met before. I'm hoping to be able to get done in two days. If Dell stonewalls it will be but one. I'll take Scott's number in case of emergency.

I've stayed up too late for what lies ahead but it is good to get this done and this affair is safe. You won't have any of this to retype.

Best,
