

Dear Jim,

1996 transcripts 7/23/76  
Charges vs Dugan, FBI

I went to bed earlier and got up earlier and I've gone over the rest of the 5/5/76 transcript. It is not yet daylight and Dugan's fascistic practice of unlaw was not as much of an emotional strain.

However, it is dirty, deliberately dishonest, overflowing with the same false pretenses, lies and promises made and not kept and enormously limited and inhibiting to us.

It is nine days since I sent Levi my complaint against Wiseman and professional responsibility. No response, as there had been none from Alley.

Not counting the day you delivered it yesterday was the 20th day after you filed the 6/30 motion. They should have responded or asked more time.

Tomorrow or Monday I think I'll file another complaint with Levi, against Dugan. On 5/5 and falsely he made charges against you three times when it was within his capability and I had asked and he had promised he withheld papers from me making my response impossible. He claims we "prevented" them "from appropriately responding."

Yet these were papers we had just received and had not been able to copy and the need to go into your files only the night before was because they had not complied. They had been told to explain making. Why should you have prepared on this assuming they would ignore the directions of the court?

It is not the adversary system within any reasonable interpretation. It is deliberately dirty and deliberately to obstruct us and protect deliberate non-compliance.

Just having to read this masquerade called justice is terribly oppressive. When it reminds me of the time it has wasted for us I get sick. And when I think that this represents the practice of those who prosecute the accused how can I believe the government ever observes the law or treats anyone fairly? It is the crime factory of the country.
