

Remission notes

7/14/77

Dear Wendell, so far no Waldron,

whose home address and Trenton bureau addresses I do not have,

With a number of interruptions I drafted the enclosed, making a few changes in the even of immediate need. I'll be going over it and retyping it. Or my wife will do type and do a good job.

Today was the deadline for compliance with the directive of the judge for an up or down response within two weeks.

The chancellors have done neither. They have given me a 40% discount on recording only. Jim Lauer got the letter today. Because I have been paying with a reservation of the right to recover I've asked Jim to grant this reservation and take the cash and go back to the judge. I'll now draft an affidavit.

The reason for this is that we go from financial crisis to financial crisis. I have an emergency account in Washington on which Jim has a power of attorney and has to date drawn all checks drawn against it. I've asked him to put the refund in that account so he will have it available in other cases. When he gets it.

If you can provide such a statement, adding whatever you consider appropriate, perhaps how it retained would be better. I don't know. It also would be better to mail to Jim, whose better address is 1251 4 St., NE 20004

You know it is not that the FBI does not know I'm giving every piece of paper to a university - free. They have discussed it with me and I've asked them to mail some directly to the university because I'll not be using it in my writing.

Not that I cannot see a very worthwhile book in it if anyone knows anyone interested in writing a good book. If you remember the old radio show, a good title might be The FBI at War in Peace. The show was The FBI in Peace and War.

Thanks for anything you may do.

For the future I'd like to know how to write to.

Best to you both,
