

JL- I'll be mailing this in the a.m. If they dry out enough I'll include about 3 pages of suggestions for Admissions. I spilled a glass of cider on them. Big glass, total spill, too. Looks like the carbon got least wet and will be legible. I'll work on other questions when I can. These begin with the rifle, etc. and include a few on the shooting and the autopsy and the tests. If I get any more done before mail time I'll include them. ...Didn't get much done today because I was able to work on the lane. The weather warmed some and I was able to sheet some pretty good chunks of ice off and out of the lane entirely. I also chopped and shovelled. If the days stay above freezing- 40 after it warmed up today - and there is any sun at all I should have all the ice out of the lane by Wednesday night. If it snows first it wount be good because there is much ice left and the covering will make the slippery lane also irregular. ...I was able to work for up to an hour and a half at a time, which made me feel good about it. ...I've written Bud a few suggestions about his CIA suit and their responses, for in camera inspection. ...Your motion on the addendum in No. 77-1831 is good. This Epstein stuff should help it enormously. I think I'll have enough for you to include in a supplemental brief. It will all be new, ~~after this~~ having been withheld and misrepresented by the government. HW 2/26/78
