Dear Jin, re Mark's case for the 6 pix end in 78-0322, 100-10461-14328 5/29/82

In the course of trying to catch up with what the student filing assistant left untouched, I've just cone across the enclosed, which were attached to the Hall 3/16/82, to which these do not pertain.

The copy of the FD-340 provided to me is unnecessarily unclear. Lil will make the best copy of it she can. You may want to ask hillips for a copy that you can read and if you get it, I'd like it.

It says on the worksheet that I got this page as a result of appeal review of 3-82. I don't know how that coincides with Mark's complaint. Or requests

If this is one of the 6 withheld pages, then it would appear that either there are only 5 pix or, because of the reference to an "album," there are more than 5 if more than one appears on each page of the album.

The lower classification review st amps can't be made out at all, but the xing through it is visible. The upper one states that classification was extended 8/29/80, or after my case was before the judge.

The FO gives its source as FBIHQ.

I can't make out the second digit of the serial number, 5?29. If you can get it from Phillips it will take less checking by me to locate it.

As you can see, the entire FD-340 was never properly subject to classification of withholding. Ye it continued to be withhold after review and when this was before the Court.

Odd that of all the many matters still ignored so long after my appeals all of a sudden the FBI comes up with this and then makes an unclear copy.

Best,

ila.

I'm sending copies to "ark
