

Dear Les,

*Whitten*

7/31/85

I got the idea of writing to the US Attorney about felonies he is involved in from a Panorama show last week on which one of Jack's kids named Mark was called a liar by one of those awful self-righteous right-wing extremists who know everything and talk all the time, a Heritage Foundation woman. Jack's kid was followed by Mitch ~~Hitchcock~~ Snyder, who did make a formal complaint to the US Attorney.

In the event it is of interest to you or them I'm enclosing a copy of my Response to their Opposition, which I can send, if wanted.

I doubt there will ever be a more completely proven case than the one I make, and there just can't be one more completely ignored. Unless one can beat 100%!

OPR is a real scandal, Orwellian, too. In the name of cleaning up they cover up. If I hear nothing from them I'll not be surprised because the evidence is beyond question and their role is covering up. So it can be risky for them to say anything at all.

Their record is so truly scandalous Jack could get a good column or columns from it. And in the few instances of seeming to do something, that they really didn't ought be obvious.

With regard to the Teamster boss who is not prosecuted because he was an FBI informer, records of which NBC-TV aired last night, there is a little-known FBI component which ought have separate and probably very interesting records. It is known as the Top Echelon Informant Committee, and all decisions relating to the finks it regards as top echelon - not by your standards or mine - must come from it.

Hope your work is going well.

Best wishes,

*Jack*
