

7/31/85

Dear Tony, *Memo*

My enclosed Response to the government's ^Upposition in the case about which I've kept you informed and my letters to the USA and OPR are for the completeness of your files.

If you want their ^Upposition, I'll send it. They don't even both to deny fraud, perjury and misrepresentation and from the record it appears they have nothing to fear.

I'm surprised that Weld is signatory as United States Attorney in the District because I believe he isn't. I think he's in Boston.

I do not know if you have any special interest in the ^Uackie Presser case or if you do whether your Washington bureau has the contacts, but the FBI has a little known component called the ^Uop Echelon Informant Committee and all decisions in any way relating to those finks the FBI considers top echelon are made by it. ^This was, I think by accident, disclosed to me some years ago in other litigation. They might have some interesting Presser records.

Please give ^{us} my best wishes.

^{Best}est to you, too.
