

Dear Jim,

11/29/83

This is the end of the draft under the heading of investigation of the crime. There will be more on this subject in other sections. I'll follow this with what public good this litigation did in bringing to light FBI publicity activities and their effects.

I want to get as much of this as possible on paper as rapidly as possible because it can be of help later, when you may have need for more than you can now use, and because it should help in more specific references to the brief.

I'm rushing when I am able to work on this and it can lead to minor errors. I remember one today. Where I refer to XXXXX J.C. Lawn, of the tickler, I think I identified him as of the Civil Rights Division. If I did it is an error. It is the FBI's Civil Rights Unit.

Not much of this is not in the case record.

Nothing new. I had some fillings today and I take her to her annual checkup tomorrow. I've got schedule mine soon. My yesterday's extraction no problem today and no sign of any bleeding.

If you have any suggestions, please let me know.

est,

C
