To Quin Shea from Harold Weisben JFK Assassination appeals 3/25/79

Attached are several slips inserted in place of removed records in the FBIHQ file on the Commission, 62-109090.

These reflect that on May 8, 1973 a total of ~~five~~ (from these slips, perhaps more I've not detected) were transferred to a different file, 62-115594.

Because they begin with Serial 1 I believe this may have been a new file that was created.

Of course I do not suggest that the FBI was using this means of removing records from this major file while information requests were pending.

Rather do I appeal on the basis that there is almost nothing that, from the content of these files and what is called the investigation, can be regarded as "O/S" which signifies "outside of scope."

Therefore these records, wherever or however filed, are relevant.
