5/26/90

Mr. B. Ross Buckley Orininal Division Department of Justice Wash., D.C. 20535

Dear 'r. Buckley.

Your letter of the 25rd is helpful and I thank you for it.

I present you will also include a schedule with each ooming batch and will indicate the claims made for any complete withholdings.

You say (b)(5) was claimed for "candid commute about Mr. Thomson." You also say that in your opinion it is applicable. I suggest that to eliminate what I believe is inappropriate use of this summettion you consult with Mr. Shee before all the records are processed rather than afterward, which could mean a considerable amount of extra work if I am correct, as my reading of recent appeals court decisions paramades no I am.

It has not been policy to withhold "candid converte" about these critical of the official account of the JFK assassination. Some pretty terrible distortions and outright fa bricetions about me were released. The official position is that we are all public figures. I can not easily believe that these comments about the nutty Thomson are more defentory than what has been disclosed about other critics. I believe Mr. Shes will confirm this if you phone him and elminate that problem as much in advance as is possible.

If you are willing, I believe I can help you with some of those matters. An extraordinary amount of information is now public because the volume of records about that most significant event is great. I remember a fair amount and can provably provide much of what is available that I do not remember. If in the course of processing you keep a list of names for which you consider a (7)(C) claim and merely mention the names to my by phone, without providing mry details, you violate no prevacy and perhaps I can provide information. I have a competent young woman who assists me part-time. She can consult my files and we can provide you with what they reflect, including citations of what the Department has disclosed about many.

You may also want to remember that the Warren Consission published three indices. In its Report there is one of witnesses and another of proper names in the Report. In Volume 15 it has all the proper names mentioned in the testimony. The Mational Archives has the Commission's name files. These will contain all that the Commission disclosed about those people.

The Fall has copies of a selective index of the Commission's public record, which includes the several volumes of exhibits, prepared by Mrs. Sylvia Meagher. She has updated it to include some of the published material of the reent House Select Committee on Assassinations. It is to be published by Scarecrow Press if it has not yet been published. Mr. Shea can land you typed copies of parts of the HSCA section which I gave him or I can land you my copies.

I do believe that you can save much work and eliminate many problems by not putting them over for the overloaded appeals office to face.

Minoerely

Harold Weisberg
