

C.A. 78-0322, records received with 8/18/81 Hall (Phillips) letter

The smaller of the two bound sets of records could not be followed by the worksheets. Because the worksheets also have numbers added in the upper right-hand corner, I rearranged them by those numbers only to find that there are two marked 4 and that they still do not agree with the worksheets.

As usual, the FBI went out of its way not to identify the records in its letter, so it adds to rather than reducing the confusion the FBI created deliberately. (They have written me before and I have seen many worksheets before now.)

Making it even more confusing, bound together there are the 100-10461 records, those listed as 100-10461-1 A and 1A1 and 4A2. Two are marked Vol 4 and the other three worksheets do not indicate what volume at all. Most confusing of all is the total absence of serial numbers on the attached records. Serial numbers are on the worksheets but somewhere the FBI found copies for me that do not include what is supposed to be put on each record when it is filed, the file and serial numbers.

These worksheets again are not dated. Supposed<sup>ly</sup> the FBI dates the worksheets when it creates them. Because they give me a different set than they keep on file they can and often do avoid dating them. The obvious ~~purpose~~<sup>purpose</sup> is improper, to hide the deliberateness with which the agreement approved by the Court is regularly violated. From internal evidence these records not mailed until August were processed in April.

The other bound records enclosed with this 8/18 letter has the worksheets dated 7-78 (which is not the way they date their own copies). It also is a miscellaneous collection which will not be understood by scholars in the future because of the inadequate description on the worksheets.

The last record in this batch, 89-43-1A-8 - 352 is described as "information provided by source." The "information" is the 247 page manuscript, "I Am a Patsy, I Am a Patsy," by the late George DeMohrenschildt. The "source" is not secret because he went to the press and was quoted by it after DeMohrenschildt's suicide. He is the lawyer. The usual and inappropriate 7C and D claims are made on the copying <sup>ED</sup> 340. (The FBI did not provide a copy of this with the DeMohrenschildt records.)
