To Quin Shea from Harold Weisberg King assassination request 11/22/78 appeal, your 11/20/78 on "EISURs"

The third paragraph of one of the letters of 11/20/78 states that a check of the FBI's BLSUR accords, I presume index, not specified, does not disclose any listing under Mr. Lesar's name or mine or that either of us was ever identified in any phone intercept.

What the FEI reported to you is inadequate in terms of a phone tap. It also is inadequate as a response to the surveillance Item of my request.

I suggest a rereading of the <u>actual</u> request instead of any FBN new substitution, an old FBN means of non-compliance.

In addition, it is my understanding that the EISUR index is not complete. One of the means of incompletness is that it does not go back to the earliest such invasions of privacy and violations of law by the FET.

On rereading of my request it will be disclosed that I did not refer to ELSUR, MISUR or MIXIN FISUR or by the FBL.

The request includes a list of names and is in terms of any form of surveillance, remardless of by whom performed. Or for whom, when, where how or why.

One of the more recent of the accidentally not withheld records of which I have provided you with a copy discloses that FBIRQ does not in fact know what of this nature exists under all circumstances in the field offices. Another, of which I may not have provided you with a copy, is a severe FBIRQ criticism of a field office for sending a tape of an interception to FBIRQ. Still another, of which I may not have provided you with a copy, is an HQ directive to all FOs to suspend surveillance on one of she persons listed in my request although it had previously been denied that there was any such surveillance.

The Patterson record of which I have given you a copy represents a form of surveillance that is within my request.

A current book I have no intention of buying reports the FBI's interception of my phone conversation(s) with someone on the west coast. The co-authors, William Turner and Jonn Christian, are not among my favorite people. Turner is a former FBI SAK who has stated his specialty for 10 years was bag jobs. He was fired.

I recall the conversation(s) very well. Christian was not using his own phone. The phone he used was that of a network-owned TV and radio station. While I suppose it is not impossible that an individual phone on that large switchboard could have been tapped that does not seen to be the simplest explanation. Christian cites a friendly FBI agent as his source. He states the essence of the conversation was repeated to him, I have been told.

I remind you that my PA request was duplicated to all field offices.
