

JFK assassination records appeals, PA request Harold Weisberg 8/16/79  
Searches

62-109060-6091, of January 25, 1968, reflects that then Senator Robert Kennedy's office forwarded to the FBI writings relating to the assassination of the President received by that office.

I do not attach the record, which states that the writing in question is not in accord with the conclusions of the Warren Commission, an opinion Senator Kennedy's office did not require the services of the FBI in determining.

It happens that I took a copy of my second book to Senator Robert Kennedy's office. From 6091 I would expect that it also was forwarded to the FBI for the FBI's expert opinion.

No such record was provided in response to my PA request and I have seen none in any of the records provided from the field offices or FBIHQ.

This again raises questions of filings outside the files searched. If there are such records and they are in other files the FBI can retrieve them.

The FBI's dislike of my work is strong. Yet I have seen references to only two of my seven books in any records provided. Particularly when it planned to have an SA front in a libel suit to "stop" me over my second book do I believe it is unlikely that no other records relating to any of my subsequent work exist, especially the third book, which is largely about the matter the FBI found objectionable in the second, and the last, which is even more pointed in its criticisms of the FBI's record in investigating the assassination.

As I have informed you, the FBI's library, according to records I have, was in "Crime Records," whether or not also elsewhere. I have received no records from this or any other Division.

I believe the searches were knowingly inadequate and incomplete and appeal the denials.
