## To Guin Shea from "arold Meisberg, JFX assancination records 9/17/78 Genuald/Mexico City; intercopts

I have adveady appealed as the withhelding under "national security" claim of FRI records related to tape records of a Lee Harvey Oswald phane conversation in Mexico Gity. I believe I have told you that the fact of this jas long been in the public domain, as it relates to electronic serviallance and to this interveyt in Perticular. I attach other relevant records for your assistance.

The letter from Fr. Hoover to Mr. Rowley was not provided by the FRI. The best received in I have is that the FRI still withholds this, although with the volume of records I cannot be certain. I suggest that the real reason for the continued withholding of records that were never classified is the content of pages 4 and 5, a negative identification of Oswald by the FRI.

By appeal included a 11/23/63 teletype summarizing that Mr. Hoover here reports and a transcript provided to FRIHQ at a later date. Both records are in FRIHQ and the Dallas Field Office. Both withheld.

November 1976 is not the first public attention to this information. However, it the 11/26/76 Washington Post story received extraordinary play. The entire front page of the next day's Chicago Sunday paper, I think Sun-Times, was on this. The play by the Post, New York and Los Angeles Times are attached. We copies have been provided by the PEL, not any records relevant save for one reflecting the PEL's being informed that Kessler was working on the story.

2

(Earlier reporting ranged from a detail/story by Lonnie Hudkins to E. Howard Hunt's account in his book of how he participated in planting devices for electronic surveillances in Horico City ephaseics.)

I believe these matters have been of interest to Congressional committeess. Ho records relating to such interest have been provided, to the best of my recollection.

Jia Losar filed a telegraphic appeal from Wisconsin on or about 11/26/76. This and relevant seconds are included within my FA request of the Department as well as the FRI. (He telegraphed the AG.) He records were provided under wither the JFK or the FA request, by the Department or by FRI.

Whather the withholdings from me were designed to facilitate or perhaps not prevent further news management and the forming of official opinion and decisions may be disclosed tomorrow when the House assassing conmittee reportedly will hold a hearing on what includes or should include this.
