REMARKS

I don't know if these two memos have any pertinent connection, but it is interesting that it both cases individuals connected with the bullfighting business in Mexico claim to have knowledge of the assassination.

In the one case, two school teachers said (through a third party) that they met a [redacted] by the name of [redacted] also known as [redacted] in Cuernayaca, Mexico in February 1967 and that he predicted the New Orleans investigation and claimed to have "vast personal knowledge of events leading to the assassination."

Departmental files contain no record on [redacted] or [redacted]. Insofar as the conversation is concerned, this information is probably reliable. With the information provided, it looks like it might be possible to find him in Mexico, or at least perhaps

the original sources, the two school teachers, should be interviewed.

In the other case, a bankrobber who was convicted for 20 years in December 1966 in Los Angeles is trying to wheel and deal his way out of jail on the grounds that he has information concerning the assassination, knew of the meeting where the assassination was planned, has documentary proof, and knows of two witnesses who have fled the country. (It is noted that [redacted] above, drives a car with New York license plates.) He also says that the information from New Orleans "adds perfectly" with what he has. 7C

This individual, [redacted] 7C has lived in various cities in Mexico and has fought in the bull ring as a bullfighter.

He refuses to furnish any information unless released from jail and transported to Mexico. He threatens to write the President and Attorney General.

Two of the three psychiatrists who have seen him in this regard feel that his information is probably fictitious. Another isn't too sure.

If these two memos do indicate a possible connection between [redacted] information in view of the bullfighting aspect, it might be easier to try to locate [redacted] in Mexico or at least check with the two school teachers who talked to him. 7C

[redacted] won't be going anywhere for quite a while. 7C
