Harold Weisberg, Privacy Act appeal, JFK association records 8/6/79

Attached is 62-109090-593, from the Commission file, of 4/24/67 as of the time Mrs. Diama Mos wrote the President and May 2 as stamped for filing at the FHI. This record exists entirely alone in the Section of records, which is unusual within my experience in reviewing countless letters of various kinds in FHI files.

being the subject of my first book, about which Fra. Noe wrote the President.

Mormally there would be an FEI comment relating to what Dufiles reflect and a recommendation not to acknowledge or respond or perhaps a draft of a response. Nothing like this at this point in this file, as provided to me.

With a copy of the letter sent to the Chief Justice in addition, the beld notetion "No Ack" appears even more unusual, especially with the added notation directing
that a copy be made. It is not provided. This copy was directed to be filed. This is to
say that there are at least two copies and I've been provided with one only. I did not
get that, to the best of my recollection, energ the salection of records provided under
my PA request.

In short I believe that with regard to Era. Mos's letter there remains non-compliance under the PA and JFK requests, both.

By this time the PEI had decided it had to "stop" me, its word. It had considered and abandoned filling a libel suit with an SA as its front. It had done the legal research, no copies of which have yet been provided, and it has decided that there was libel, no illustrations of which have been provided along with what is necessary, factual proof.

Conclusory comments are included in what was disclosed that, without any backup, amounts to defanation. The Lab and Logal Counsel were involved, but none of their alleged work was provided.

I don't know if the number "226" in the lower left-hand corner provides any kind of lead but I have seen such numbers added to records that appear to have been destined for a place other than Central Files alone.

How the FBE remoted to criticism and what it did about books and authors it did not like are of historical and political importance. I therefore provide what I believe may give you some perspective on this.

I had completed my third book, had begun the fourth, and had been in New Orleans for the first time for a fow days. A few months carlier one of the few copies of my second book just meneged to got lost in Hen York. By printer did not have a copy of it by the time the Mirator lesued a proces statement calcing response to it, which I found and find as unusual as my inability to get a copy of that release suitable for facsistle beproduction. (Such later the Foll told Mr. Least to file on FOLA request for a copy of that press release and in that way, almost a decade later and after publication of the book for which I intended it, I did get that press release.) The ribben copy of my second book suffered a series of minfortunese in the nail, from which printed copies of my first and second books requested by those who wrote to me were suffering mysterious disappearances. The Post Office never found a single one of these "Leet" copies, not ewen in the serms and waste paper it was required to save and sell. After I got the carbon copy intended for my Italian publisher to my agent in New York and long after the Post Office reported that search did not disclose the missing ribbon copy, my agent received it. When the Those of Lordon wanted to read the nemanorist my agent sent the ridion copy to its Washington office, which never received it. Instead, six washe later. I received it in the smil with a note from the Washington Post Office explaining that it had been received without wrapping and it was being ment to the address found on the inside. Only it was addressed as not on the inside, and with impressive magic, the double wrapping disappeared in the scale without a cingle peop getting dog-eared.

There was a substantial escent of information in this book relating to the FBI, to what it had not investigated and reported, to what it had not told she Marron Consistion, to what it had misrepresented to the Commission, and even Like which stated the opposite of the underlying records relating to Oscald's career in New Orleans. and all of this coincided with the Carrison beginnings, which did interest the FBI much.

For contrast and comparison I provide another second of the same period and from the same file (although designated for duplicate filling), Serial 595. Here, without any of the underlying material (which remains withheld and I do appeal this because I do desire it), there are seven pages of alleged detail on a book more to the FoI's liking and simultaneously of remarkable dishonesty. It was by Laurence Schiller, the most successful ghoul/scavenger of recent years. (Among the detail the FRI saw fit not to include is the fact that as Jack Ruby's agent he nameged to pocket more than half of the money he is known to have raised estensibly for Ruby's legal defense.) In this record I am marked for indexing but although I may have forgetten it I do not recall receiving this under my PA request.

This record appears to have gone to many in the FMI, including for no apparent reason SA Shaneyfelt. The part of the book that relates to me also relates inaccurately to SA Shaneyfelt's work, albeit ourse pleasantly for the FMI. At the time I thought it remarkable that Schiller, who was not reknowned for doing great amounts of detailed work, had so much partises detail relating to SA Shaneyfelt and how it was of no consequence that when SA Shaneyfelt filled a reconstruction of the crime it was 30% off on time.

There is no deficiency of similar records among those disclosed by the FRI. I provide this one because only one number separates it from the Ers. Noe letter.

Meanwhile, unless the FHI is profe to allege libel and plan "stopping" suits with no factual and legal basis there are underlying records relevant in the JFA cases and my PA request that have not yet been provided. I am again appealing these demials.
