

JFK assassination records appeals  
— book reviews by FBI  
my PA request

Harold Weisberg 10/9/79

In the past I have appealed the withholding of reviews and related records and of files not searched to locate and provide these records.

Attached is 105-82555-4114. It indicates that the FBI obtained books relating to the assassination and its investigation, that they were reviewed, by whom, and where relevant records should be outside of Central Records.

While I am not familiar with all of the literature I am familiar with most of it and I have not found reviews of most of the books in the records provided. From other records, usually ~~are~~ conclusory and serving special FBI purposes, it is clear that the FBI obtained and reviewed books the reviews of which have not been provided.

As this relates to me and my PA request I have seen references to three of my seven books only. Of course what relates to me and my books is also within my PA request.
