

JFK assassination records appeals
Withholdings by shifting records around
Withholdings relating to surveillances
→ Classification

Harold Weisberg 3/21/79

- MURK

Both of the attached records are from 105-62555 Section 96.

The charge-out for 2470 had an unjustifiable withholding, which is inconsistent with past disclosure of "June" mail. Again I appeal the denial of what was shifted from the Oswald file.

Although it is the FBI's mythology that it never classified records, having no need to, 2484 is of 1964 and was classified.

The most casual reading discloses that there is no national security involved and that ~~the source referred to as masculine may be~~ the possibility of the source being caught in what might embarrass it.

There is the possibility that the source referred to as masculine may be Electronic. I have read the underlying record.

With the passing of time, now more than 15 years, and because this is an historical case I believe that all records of all surveillances should be disclosed.

This applies also to 2443, where the note says a bit more about the source.
