

JFK appeals - indices - Dallas

JFK assassination records appeals
Dallas indices

Harold Weisberg 8/16/79

Attached is 62-109060-4755, a Dallas airtel of 3/10/67 prepared by retired SA Robert P. Gemberling, who was more or less in supervisory control of the Dallas JFK investigation from the outset. He supposedly had the best knowledge of the Dallas records.

Gemberling does not state the purpose of the airtel or the attached LHM to which it refers. It appears to relate to the Garrison carryings on.

Please note that Gemberling refers to indices, not a single index, "on the captioned investigation."

I believe I have noted the existence of more than the single index and have requested all indices.

From the context and its form the documents index cannot have been intended as included for the use of the plural, indices.

If any notations were added to the Dallas copy, and I don't know that any were but believe a notation of what was searched would not be unusual, I cannot determine it because it is withheld as "previously processed," along with the Dallas copy of the LHM.
