

Dear Jim,

8/7/81

You keep giving Metcalfe escapes and he keeps being party to the FBI's dirty tricks while conning you into thinking otherwise.

You were to have taken up with him what I'm not going to waste any more time on, searching the Hosty files as I asked on appeal two or more years ago. I gave you the number. If he has any deal with the FBI it is secret and it certainly isn't indicated in their unsigned letter stamp dated 8/5/81, of which you got your copy yesterday.

As soon as I saw a reference to that file number in the records I received today, with "il having the copier running for a different purpose, I made you a copy of the one closed, one for him. Afterward, as I went into the few remaining pages, I saw that some had copies designated for both files.

I'm tired, as I told you earlier when you poned, I don't feel right, and I'm not going to argue. You have again not does as I asked in this case and again I'm dangling, wasting more of my life. If you have done it you've not let me know. I see no end your way, so you handle the rest of this case the way you want to. I'll read the records, of course, but it is absolutely pointless to try to do anything about what they withhold or don't supply and I don't want to get upset or waste any more of the great amount of time this has wasted.

Sincerely,
