

JFK assassination records appeals - Warren C. De Brueys

The attached Not Recorded Serial from Section 186 of what I believe is 62-109060 (the number is unclear) refers to a record I have not seen, the transcript of an authorized CBS interview with the since retired then San Juan SA De Brueys. Earlier he had been an SA in New Orleans and is among those of special skills who were sent to Dallas.

Unfair and I am confident false charges had been made against De Brueys by a man with whom he'd had some problems years earlier, Orest Pena. In essence Pena claimed to have seen De Brueys and Oswald together.

All CBS aired of the interview is a brief strip of film that was hardly more than a formal denial, no more than was necessary to avoid allegations of unfairness against CBS.

I believe that any fuller version is an historically important record because of the widespread attention given to the Pena allegation and because he was also a witness before the Schweiker subcommittee of the Church committee. (I was unsuccessful in my efforts to get Pena to recall that he had given me a different version of a similar story in which De Brueys did not figure. I believe I also indicated to Senator Schweiker that the story had become mythology and was baseless.)

If Pena was a House assassins committee witness then there is added historical importance to the record and added reason for the full transcript of the interview to be available in fairness to De Brueys and his family. Even if only at some distant future date.
