

non - destruction of evidence

JL- While attached 62-109090-451 is about the legislation to preserve the Commission's (and FBI's) exhibits I encourage a careful reading of it as the AG's broad and firm statement of policy with regard to the preservation of evidence and for the stated historical importance. It has wider applicability than in 226 and the alleged discarding of the spectro plate. Note also the forecast of an undescribed "re^{ass}essment and evaluation of the conclusions...", which can mean by private persons such as me and under the broad doctrine laid down in FOIA. What it says about secrecy and its consequences also is significant ~~at~~ before there was an FOIA. H 10/5/79
