

Dear Jim, re Epstein/Nosenko requests

12/11/80

Although I thought I had a separate file on the CIA requests, it appears that I do not. What is herewith is from the CIA Chron file. Other records may turn up and there may be other records that are misfiled. That file did not survive Scott Malone's ~~work~~ work very well.

There are several DJ/FBI files, from which I provide all I think you'll need now. There is more if and when you need it and there may be still other pertinent records in the DJ/FBI Chron file.

There also is a fair amount that I provided to Shea, APPEALS, ETC.

Remember, there was an FBI/Shea agreement that all EK assassination information disclosed would be provided to me. The FBI agreed, it is in writing, and it thereafter ignored its agreement. (Third party nonsense.) This includes what Epstein got.

This is in the discovery material prior to the depositions in 1996. I gave you extra copies at that time. Of course we have it elsewhere but from the FBI's own files is, I think, better if you need it. It is Shea's reminder to the FBI, after my complaint.

Best,
