

JFK assassination records appeals

Harold Weisberg 9/30/79

✓ Field office files - records not provided, files not searched

The distribution at FBIHQ of 62-109090~~236~~ was extensive. The copy of the record provided to me is as remote a generation copy and of as poor quality as the attached copy reflects.

When I received the Dallas "Commission" file I appealed because it was apparent that the file did not begin until the life of the Commission ended. I have had no response.

Dallas had extensive relations with the Commission and a file was required for keeping track of everything and letting FBIHQ know.

The attached record perhaps explains this (page 2) in directing that "Dallas is instructed to open a new file..."

The date of this record is three days after the official life of the Commission ended.

The numbers stamped on the second page, 44433 and 756 are new to me. I do not know whether they also represent another FBIHQ file.

In connection with my appeal of today in which I refer to the FBI's knowledge that the Commission's "backup material" was being printed and thus the record generated was not faithful, I note the language stating this in the attached record. (Page 1, paragraph 2)
