JFK assassination records appeals

Harold Weisberg 9/22/79

Files not searched - the DeLoach operation and the 94 files

The attached Not Recorded Serial of 4/9/64 is from the 62-109090x1 file. The original is in a 94 file, partly illegible. No records have been provided from and there has been no search of any 94 file despite the relevance and high degree of importance of the FBI's public relations and leaking operations in connection with the JFK assassination and its investigations.

The withholding of the identification of "an SAC contact" is inconsistent because in the past the FBI has not withheld such identifications. (However, I have no personal interest in this one.)
