Files not searched

Harold Weisberg 9/21/79

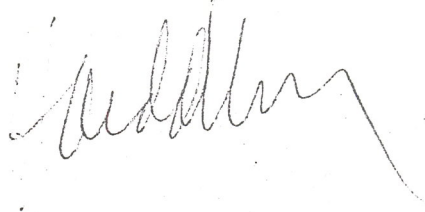

In recent examination of the 62-109090 file records I have come across repeated references to what should exist as a separate file and from which I have not received any records. It is called SAC letters, from FBIHQ, and is of special letters, not the normal airtels and similar communications. It is referred to by number, indicating that these SAC letters are numbered serially.

Such a collection would have considerable historical importance.

There is also reference to what appears to be another Commission file or to a file in which information relating to the Warren Commission is filed. It is HQ

62-7225.

Wherever such information is filed it is relevant.

A handwritten signature in cursive script, appearing to read "Harold Weisberg", is written in the lower right quadrant of the page.
