

JFK assassination records appeals  
~ Jim Garrison  
Impersonation file

Harold Weisberg 3/3/80

In 62-109060 6184, where most of the several records having this number are such poor copies they can't be read, there is reference to a duplicate filing as #70 47-53716-1, which is the original. Other of these records do not bear this file identification. (There is another after 6158.)

The FBI suspected that the matter was an effort by Jim Garrison to latch onto disaffected former FBI employees. While it is not immediately apparent how what the FBI suspected could have worked out, any such effort by Garrison would be an important part of the historical record.

Not only is the 47 file pertinent, I would like to be able to read these records and I would like scholars of the future to be able to, particularly those who may not approve of the Garrison exploits.
