ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED

I almost forgot ~~ALASHI~~, ~~Al Lash~~ in the index. He is Rolando Sank
 Gubala, a Cuban official the CIA as code named when it tried to use him to assassinate
 Castro. The CIA's ~~Personel~~ Fitzgerald flew to Paris to give him a poison pen (literally)
 and was still with him when JFK was killed.

There are 6 entries in the index, from 5 to 11/76, 89-43-9720, 9803, 9813, 9814, 9825,
 and 9901. The time coincides with the interest of the Senate's Church committee. And
 with publication, which was widespread.

Of these six Dallas records I have been provided with one only, 9901. It is a
 newspaper story.

There are no cross references provided for the other five records so there is no
 way of knowing whether they were provided from ~~FBI~~ records or which they may be.

The FBI had its own interests in CIA plots against Castro. It liked to keep the
 White House informed of them, for example. But from this index card it would appear
 that the FBI had no knowledge for almost 13 years, until the story appeared in the papers.

This would surprise me.

May I please have the withheld cross references?
