

3/30/79

Dear Paul,

If this interests you make a copy.

I'm curious about the Secret classification for records that include anonymous letters, not identified in their relevant files.

I don't know if the D numbers are included in the stuff itemized in the Clark 10/31/66 executive order because I can't find my copy.

Please return with any suggestions tyou can make.

I've located proofs of Lab testing relating to the Aldredge shot and of an empty rifle casing found in a Stemmons bldg. 1/4 mile away. I've also located proof, for whatever it may mean, of a rifle bullet taken from where it was imbedded in a bldg. not any farthur away.

And then there is the finding of what may have been the bullet of the "missed" shot.

Jim, Howard and I expect another remand in the spectro/NAA case. This can make anything from Guinn important.

The function of the Lab is assuming proportions I'd not realized. They also did the tapings of radio and TV shows in which the FBI was interested.

Best,
