

To gain ideas from Harold Weisberg King and JFK assassination records appeals 3/19/80

Some months ago, when it was first published, I read William C. Sullivan's book. The former assistant director of the FBI says much that is pertinent to many of my appeals in both cases. I therefore began to write you about it, citing what I believe supports these appeals. Other work, particularly the needs of litigation, interrupted me and I did not complete what I started long ago. I have gone over it, made some corrections, and send it now. Below I indicate some of the topics:

- National Security claims
- Electronic and other surveillances, including
 - unauthorized
 - mail interceptions
 - burglaries
- Neenan/Spatin request
- Belouch/Grise Records operations
- Leaking (not all by Belouch)
- Information provided to other writers
- Cooperation of other police; their records disclosed
 - foreign
 - domestic
- Legate operational, men informants, etc.
 - Mexico City office described as operational; its territory outside Mexico
- Searches not made
 - Special File Room
 - Divisions
 - Hoover's files and file rooms
- Tarrants request
- Oswald Lab tests; the Lab's records
- Disciplining of SAs in JFK case
- Oswald/Mexico information
- Gerald Ford (as FBI informer) - records not provided
