

Dear Jim,

1/27

I got much angrier than my letter to Lynne reflects.

These lying bastard, these professional perjurers making aspersions about my honesty atop Sheaa's unretracted slars about your representations about my health is just too much.

If Figley did not know better Lynne should have and should have had something to say instead of being silent through such gross insults.

Meanwhile, Civil Division has a very clear record: it is assuring continuing non-compliance in the guise of seeking means of compliance.

I want you to agree to make two immediate requests of Civil: that it see to it that I get the records I refer to in the letter to Lynne and get them promptly. I also want you to make a matter of record their refusal to examine the record of my appeals to the FBI.

They told the judge I am incomprehensible. I told them they could save themselves money and time and save me time by reviewing what I wrote and gave the FBI. I did give it copies of records to illustrate specifick wrongful withholdings -more than a half year ago. No response.

If they refuse they become part of the machine of non-compliance in the open.

It also put them on the defensive. They can't defend this. Or their silence.

This is why they make an issue of my writing them. They know you can't take time to write about such matters and that my doing it through you wastes more time for both of us.

Also please make demand for compliance on the matter of the "tramp" picture and sketch. Lynne told them to perform on this and she did promise it to the judge. Since then there has been no word at all.

I use this because it is so unequivocal and so simple a matter and because it involved my personal property. Also because the FBI not only has false records about it but lied to me and to us in a meeting about it.

Lil's client, who had come only to leave some records for her, left when I put this paper in the machine so the envelopes to you and Lynne have gone.

Now I am serious about this. I am determined to end this personal voffication and its intrusion into the legal cases. I am also determined to make an issue of it before we are in court again because I'd prefer that it not intrude into judicial proceedings. However, if they make so much as hint of it in court I want you to ask on the spot that I be permitted to testify to that and to the entire history of it and what it represents.

These swine are not just stonewllaing. They are persisting in the FBI's dirtyworks of seeking to make false records to undermine my work and its credibility.

If they do it one more time it will, one way or another, be in the open.

Still angrily,
