

FBIHQ JFK appeals

To Quin Shea from Harold Weisberg JFK Assassination appeals 3/28/79

A set of 62-109060 worksheets, for Section 25 although the cover does not so indicate, reminds me that the mail intercepts by the Postal Service and the CIA for the FBI is well known, having been testified to before and reported at great length by the Senate Intelligence Committee. I've read that testimony.

Moreover, well over 15 years have passed.

I see no reason for any b1 claims for such records. I assume some of these in these bulkys are intercepts.

In more than a year and a half there has been no action on those referrals. (Some are also to CIA).

There is a problem not within any exemption: the CIA has not been forthright about this. I believe it has failed to acknowledge all the copies of intercepts it has.

If there not an E.O. provision requiring action by the referring agency if after 30 days there is no response on a referral of classified material?
