

JFK assassination records appeals
Missing records

Harold Weisberg 10/19/79

In place of 62-109060-2374 there is a slip stating that the serial was skipped.
My attention was drawn to this form because all the entries are illegible except for the number. That is written with a broad, black pen, of a type I do not believe existed in the time in question. In addition, while illegible other entries are on the form there is no visible indication that the number was written over an illegible number. I ask that this please be checked.
