Yuri Nosenko - withholding the public domain - Warren Commission records

If you have a special file for the absolute in ridiculousness, abusiveness and as an alternative incompetence in FBI FOIA processing then I believe the attached Not Recorded Serial from 62-109090 Section 5 belongs in it.

The withheld information is the identification of Yuri Nosenko.

It was released by the FBI by early 1975, when I obtained it from the Archives.

I also published it in 1975.

I remind you once again of your letter in which you claimed that what the FBI disclosed in Warren Commission records it did not withhold in its processing of JFK assassination records.

And again I suggest that you might want to withdraw that letter so that it will not continue to confuse and mislead in this case and be subject to later misuses.
