

JFK assassination records appeals

Harold Weisberg 9/15/79

Marina Oswald- Surveillances of; withheld Dallas records

Attached is a Not Recorded Serial from 62-109090, a Dallas teletype of 3/4/64 that is also in Dallas and FBIHQ Lee Oswald files. I intend it to amplify my prior appeals relating to the withholding of information about Marina Oswald. I intend the appeal to include the information withheld at the beginning of the teletype and the records on which it is based, Dallas records not provided in C.A. 78-0322.

The most casual reading of this record leaves no doubt that most of its content is not based on the admitted "FISUR OF MARINA OSWALD."

It is not the only record I have provided that leaves little doubt about the FBI's electronic intrusions into the life of the widow/public personality.

The fiction on which this was based and by which it was justified is the contrived fear that she would flee to Mexico.

By the time of this record she had more money than she had ever seen in her life and had made clear that she yearned to remain in the U.S. Moreover, if she had fled she'd have been penniless because none of her money was in her possession.

The FBI has fictions for all cover-the-Bureau occasions. But none is an exemption under the Act - at least not a legislated exemption.
